WYDOS LTD, EXPERTS IN WIDE FORMAT TECHNOLOGY

3 SERIOUS & COSTLY MISTAKES PEOPLE CAN MAKE WHEN BUYING PLOTTER PAPER..

WYDOS Experts in Wide Format Technology

PLOTTER PAPER

FACT ONE: ROLL LENGTH

Different plotters use different length rolls of paper.

As a general rule most Canon Plotters use a 110m Roll and HP tend to use a 50m roll, HP Plotters costing £3000+ tend to use 90m rolls.

50m rolls will fit on all machines

Using a the largest roll that fits your machine will SAVE YOU MONEY

See our Guide at the back of this report to see the roll that perfectly fits your machine :-)

YOU ARE WELCOME

PLOTTER PAPER

FACT TWO: ROLL WIDTHS

Different plotters use different width rolls of paper.

A1 - Plotter paper width is usually 594mm

A0 - Plotter paper width is usually 841mm

You only need to use papers larger than this if you need extra width on a sheet, such as 610mm or 914mm. These are AMERICAN SIZES, 610mm is 24 inches, 914mm is 36 inches
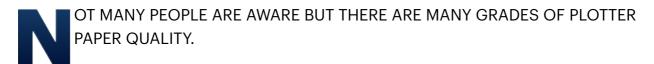

TOP TIP

Standard Sized paper widths 594mm (A1) AND 841MM (A0). FOLD PERFECTLY TO A4 SIZE and FIT IN STANDARD ENVELOPES AND HAVE NO WASTAGE : SAVING YOU MONEY AND THE ENVIRONMENT

PLOTTER PAPER

FACT THREE:
QUALITY & WEIGHT

NOT MANY PEOPLE ARE AWARE BUT THERE ARE MANY GRADES OF PLOTTER PAPER QUALITY.

"WATCH OUT FOR ONLINE SELLERS WHO LOOK INEXPENSIVE BUT ARE ACTUALLY SELLING THIN LOWER GRADE PAPERS OF 80GRAM OR LESS"

JUST LIKE PHOTOCOPIER PAPER, PLOTTER ROLLS COME IN DIFFERENT THICKNESSES AND GRADES.
